MOBEYE

Storage locations and garage boxes

Security for the garage box or storage location

The garage or other small storage sheds are ideal places to keep valuables: the stock of your company, an antique car or other property. Unfortunately, these valuables need protection, especially if the location is remote.

For small objects and locations without external power supply, the Mobeye i110 offers the ideal security. This all-in-one GSM alarm system works entirely on batteries, has a built-in movement detector and an integrated GSM dialler. Upon seeing movements this compact system calls and sends text messages to the set contacts.

Security is made easy!

Mobeye storage alarm

What you need:

A Mobeye i110 all-in-one alarm system is complete including the batteries. Just enter a SIM card of any provider to get the system operational.

How it works

- Place a SIM card
- Place the batteries (included in packaging)
- Program at least one telephone number for receiving alarm messages
- Put the Mobeye i110 down or fix it to the wall, with the eye in the direction of the 'route'
