Applications for measuring, control and alerts

MOBEYE i110

SHIPPING CONTAINER ALARM

Shipping container intruder alarm

A shipping container is a good, safe and affordable storage location. But don't let intruders get your stuff! The Mobeye i110 Shipping Container Alarm is an all-in-one battery-operated intruder alarm system. The on-board GSM module will warn you as soon as intruders are detected. For optimal GSM strength, an external aerial is placed at the outer wall of the metal shipping container. The Mobeye i110 has a PIR movement sensor and a temperature sensor. For more functions such as a listen-in or additional sensors you can opt for the Mobeye Argos shipping container alarm.

Security is made easy!

Mobeye container alarm

Mobeye i110-SMA

Self-contained alarm system with GSM on board, prepared as i110 Container Alarm (SMA connector).

Mobeye AC-AN-MB30

Vandal proof and weather resistant external 'mushroom' antenna with 30cm cable.

How it works

- Bring the antenna from the outside to the inside of the container and fix it with the included screw-nut.
- Insert a SIM card and the included batteries in the i110 and program at least one telephone number as alarm receiving number. If desired the Mobeye Argos can send test messages with a self-chosen interval.
- As SIM card we advise the Mobeye SIM card so you can use the Mobeye Internet Portal as management tool. Alternatively, you use your own (normal) SIM card.
- Battery life time is over a year. Once the batteries need to be replaced, you will receive a message.
- Activate it using the code. The Mobeye i110 Shipping Container will guard over your belongings!
